

COMMON SENSE FENCE™

Fiberglass Fence Post System

by

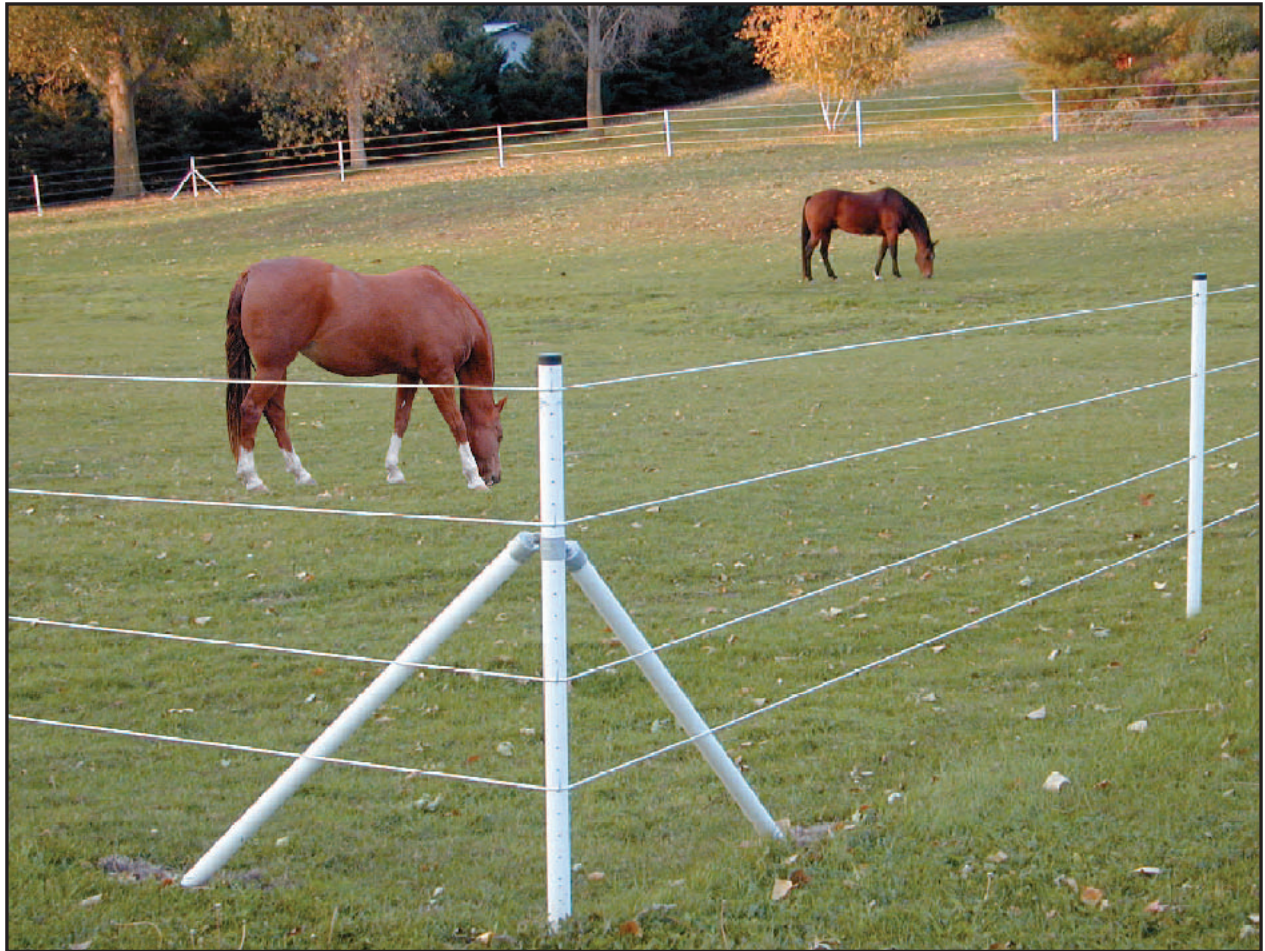

The Perfect Combination Of:

The MULE™ Corner Anchor System *plus*
SunGUARD® II Fiberglass Line Posts *and*

Horse Fence Rope

Common Sense Fence Makes the Best Horse Sense

- *Extremely Strong & Durable*
- *Safe, Secure and Simple*
- *A fraction of the Cost of 3-Board or Mesh Fence*
- *Easy to install Yourself*
- *Very Low Maintenance*
- *Backed by a 25 Year Warranty*

Reduce Injury With ElectroBraid™

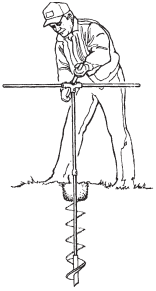

Dangerous situations can happen to horses when fenced. The panic situation that causes a horse to try to jump the fence or run through it to escape, can result in severe injury. The ElectroBraid™ emits a harmless shock which is a strong deterrent against wanting to challenge the fence. The resilience of the fiberglass post and braids allows the fence to “give”, absorbing the force of an impact. The strength of ElectroBraid™ provides barrier security. A 4-strand ElectroBraid fence has been tested to withstand over 5,000 pounds of force.

Easy To Install MULE™ Corners

With a simple 3 step installing process, your fence can be up and functional in a few hours. With the MULE™ anchoring system there is very little digging necessary. And once you install the Fiberglass Line Posts and string and secure your ElectroBraid™, your job is complete.

Step ONE
Screw in Anchors.

Step TWO
Secure Fiberglass Corner Posts
and Braces To Anchors.

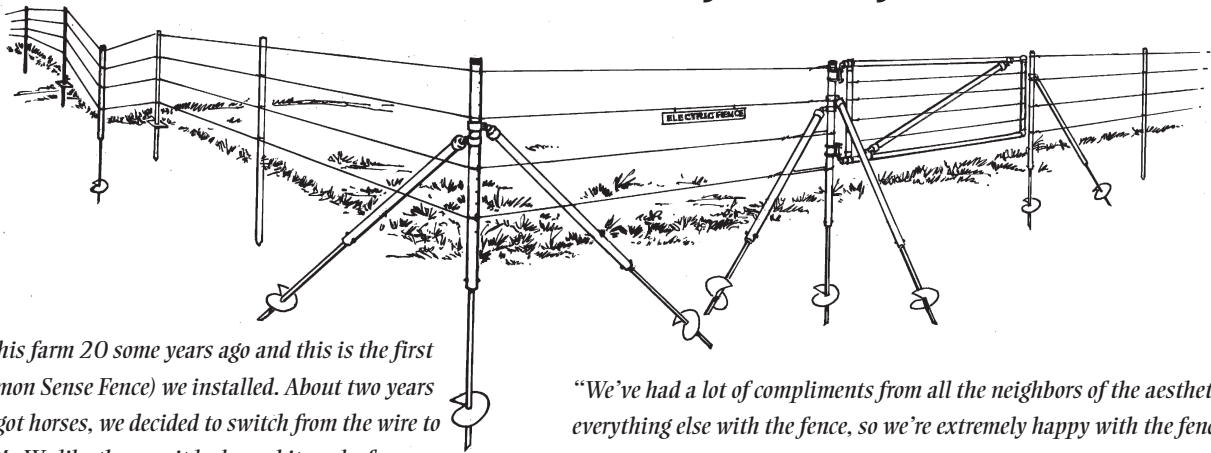

Step THREE
Install Fiberglass Line Posts,
String and Secure ElectroBraid™.

- Fiberglass corners and line posts with SunGUARD® II, built to last a lifetime.
- MULE™ Auger Anchors have superior holding power in any soil - it's how electric utility pole brace cables are anchored.
- The tougher the terrain, the more benefits you get.

Long Lasting Fiberglass Posts

Both SunGUARD® II posts and ElectroBraid™ fencing are virtually maintenance free and are backed up with a 25 year warranty. Our SunGUARD® II line posts provide superior strength and good flexibility resulting in maximum fence life and horse safety.

Combining the Common Sense Fence™ System with ElectroBraid™ creates a safer and more effective system for your horses.

“We bought this farm 20 some years ago and this is the first fencing (Common Sense Fence) we installed. About two years ago when we got horses, we decided to switch from the wire to ElectroBraid™. We like the way it looks and it works for our horses.”

Carol K. - Horse Owner
Chatfield, MN

“We’ve had a lot of compliments from all the neighbors of the aesthetics and everything else with the fence, so we’re extremely happy with the fence. The way it looks, how it behaves, the installation, the whole nine yards.

Phillip Conway, Conway Arabians, Chatfield, MN

“I had this fence installed about two years ago, and since that time I’ve had zero maintenance costs. And to me that’s money in the bank.

Cindy H., Rochester, MN - Horse Owner
