

# The Truth About Fiberglass Tree Stakes The Smart Stake™

Don't Be Fooled  
by Cheap Imitators!  
Get the Warranty Facts!

**No Glass  
Slivers  
Guaranteed!**

*IS THE ONLY FIBERGLASS TREE STAKE  
WITH 100% UV PROTECTIVE*

## **SunGUARD® II**

*COATING TO PROTECT YOUR  
STAKES FOR DECADES TO COME.*

All fiberglass tree stakes claim to have full UV protection, but UV resin inhibitors or polyester veils do not stop resin UV degradation.

- Resin coating breakdown can occur quickly after only one year in the field, dramatically reducing the “useful life” of the stake.
- The **Smart Stake™ by Geotek** is the only tree stake which has 100% UV protection provided through the exclusive patented **SunGUARD® II** UV coating process, as well as resin-based UV inhibitors, and comes with a full 20 year warranty.

No generic “useful life” claims here, the Smart Stake™ is the Only Tree Stake With Our Patented SunGUARD® II UV Protection Coating with a 20 Year Replacement Warranty against glass slivers coming to the surface of the stake.

# Smart Stake™

## with SunGUARD® II Coating:

### Performance:

Notice how the Smart Stake™ allowed the right amount of flex to take the pressure off of the individual branches while giving enough support to weather the storm (i.e., much less storm damage to trees).

**Smart Stakes**

The only stake with a 20-year replacement warranty against glass fiber slivers coming to the surface of the stake. Our SunGUARD® II coating will protect your stakes for many decades!

Same Storm, Same Field, Check out the Difference!

**Metal Conduit Stakes**

### Labor Savings – More Profit:

- No Re-staking
- No Fixing Bent Stakes
- No Straightening Leaning Trees
- Harvest Higher Grade Trees

**Conduit close-up**

Let the Smart Stake™ Help Improve Your Product, Costs, and Bottom Line
